PROFESSIONAL SUMMARY

Frontend Engineer with 4 years of experience building scalable, user-facing web applications using React, TypeScript, Next.js, and Node.js. Skilled in frontend architecture, REST API integration, and cross-functional collaboration. Proven track record of improving client engagement, reducing bugs, and delivering production-ready products across fintech and social impact platforms.

WORK EXPERIENCE

Frontend Engineer — COAPPT — Remote

Remote · Jan 2025 – Present

- ▶ Led a frontend team of 3 engineers in a cross-functional setup, delivering scalable products that boosted client engagement by ~15%.
- ▶ Built the frontend for COAPPT's MVP, a social impact platform, helping it attract 500+ users within its first three months.
- ▶ Collaborated with project managers, product owners, and QA to streamline delivery, reducing feature handoff delays by 20% and improving release consistency.
- ▶ Introduced code reviews and testing practices that reduced frontend bugs by 20% and improved overall development speed.

Frontend Developer — CHB LUXURY

Remote · Aug 2024 – Dec 2024

- ▶ Refactored and led the complete frontend migration of the company's e-commerce platform from PHP to React.js, boosting user session duration by 15%.
- ▶ Optimised data handling and state management with React Query, improving system reliability and developer efficiency.
- ▶ Implemented advanced analytics tracking across the platform, giving stakeholders real-time visibility into user behaviour and boosting feature adoption by 20%.
- ▶ Integrated the Google Places API to automate delivery fee calculations, reducing checkout errors by 25%.

Junior Frontend Developer — INSTITUTE PAY

Remote · Nov 2022 – Jul 2024

- ▶ Engineered and maintained secure frontend components for a payment solution, enabling seamless processing of thousands of transactions for educational institutions.
- ▶ Contributed to the integration of secure payment gateway features supporting card payments and bank transfers.
- ▶ Improved checkout workflows and error handling, reducing failed transactions by 20% and enhancing user trust in the payment platform.

SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, Redux, React Query, Zustand

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL

Tools: Git, GitHub, RESTful APIs

EDUCATION

Bachelor of Science in Mathematics · Federal University of Agriculture, Abeokuta

PROJECTS

[Lyngo](#) — Language Learning & Vocabulary Building App

Built with Next.js, Typescript, Tailwindcss, React Query, Prisma, Better Auth and Neon DB for database

- ▶ Built a Progressive Web App (PWA) with web-push notifications, enabling native-like cross-platform alerts and seamless home-screen installation without an app store
- ▶ Architected a full-stack backend using Next.js App Router, Prisma ORM, and Better-Auth, delivering secure session-based authentication and scalable relational data management.
- ▶ Implemented slug-based dynamic routing with SEO metadata optimization, improving content discoverability and enabling social sharing through a custom Share Overlay component.
- ▶ Designed a gamified learning system with daily streak tracking and micro-animations via Framer Motion, increasing user engagement through continuous reinforcement loops.
